IN THE SPECIFICATION

1. Please rewrite the text following "Cross-Reference to Related Application" as follows:

--This application is a division of U.S. Patent Number 6,673,426 filed September 26, 2000 entitled "Transfer Body and Method Using the Same" which claims priority benefits of Japanese Patent Application 11-275199 filed September 28, 1999 for which a certified copy of this priority Japanese application document was filed in the parent application.--

2. Please rewrite the specification on Page 20 lines 20-24 as follows:

--The adhesion strength of the interface between the peelable layer 20 and the supporting body 10 was 4 g/cm at two days after the heating treatment. The pull strength of the peelable layer was measured by tests carried out applying ISO 527-3. The measured value was 150 g/cm.--

3. Please rewrite the specification on Page 25, lines 8-12 as follows:

--In order to evaluate the adhesion between the intermediate layer and the color filter layer or between the color filter and the adhesive layer, those layers were individually formed on a glass or the like. They were not peeled off by a cross-cut test performed following the protocol set out in ISO 2409 (1992).--
